

COLOUR SWATCHES

For balcony/planter box/outdoor decking, Calvary Composite is recommended.

Every piece is removable in our decking system thanks to our EZ-rail[®] removable clip, making future maintenance easier.

For example, if we land 15 pieces of decking and the 5th plank needs to be replaced, you can simply pop our piece and replace it easily as we sell individual planks.

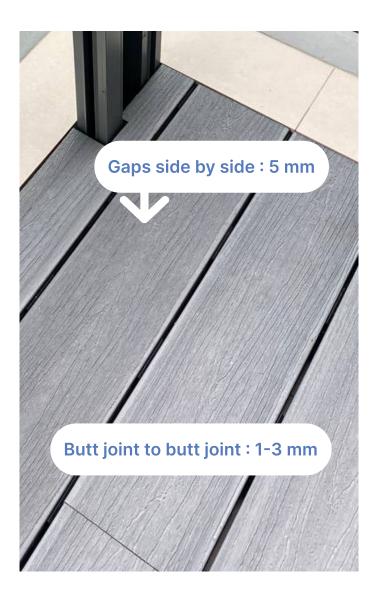

4>

limited movement for expansion and contraction

Ez-rail[®] clip system is spring loaded. It allows limited movement for expansion and contraction.

Whenever planks starts to expand and contract, it will not push against each other that results in warping.

On top of that we will install an access panel (easy lift up) on both ends to make it easier for you.

COLOURS

Our decks comes in different colour variations. When you piece out together, it does not look homogenous as it mimics natural timber finishings.

CONTENT

70% plastic (polyethylene) & 30% recycled wood dust.

(3 ticks)

STATS

SGS

Anti-slip

Easy to maintain without sanding and varnishing.
